

2016 Healthcare Common Procedure Coding System (HCPCS) Update

The annual update of CPT/HCPCS codes will be effective for services rendered on and after January 1, 2016. Services provided on or after January 1, 2016 should be filed using the 2016 codes. Services rendered in 2015 should be filed using 2015 codes.

HCPCS is a five-digit coding system using numbers and letters. There are two divisions of codes assigned and maintained by different organizations:

Level 1: The first division is the CPT codes established by the American Medical Association. These codes range from 00100-99999 and represent physician services such as examinations, radiology, pathology, and surgery.

Level 2: The second division of codes are assigned and maintained by CMS. These codes are a combination of one letter and four numbers that range from A0000-V9999. These codes are common to all carriers.

Medicare Part B 2016 HCPCS/CPT Code Adds
