

CMS-1500 Claim Form/American National Standards Institute (ANSI) Crosswalk for Paper/Electronic Claims

There are two ways to file Medicare claims to CGS - electronically or through a paper form created by the Centers for Medicare & Medicaid Services (CMS-1500). The required information is the same regardless of whether you file electronically or if you qualify for an exception to file paper claims. This document illustrates how each element on paper claims corresponds with the loops and segments for electronic claims.

Each individual loop on an electronic claim has a segment component where the data is entered. The loops and segments contain the readable information that provides the clearinghouse the identifying information for the claim that was filed. The loops on an electronic claim are organized by categories of information that match data elements on the CMS-1500 claim form.
