REQUIRED DOCUMENTATION

☐ Documentation of Dispensing Order (preliminary written or verbal order) that contains:
  ○ Description of the item
  ○ Name of the beneficiary
  ○ Prescribing physician/practitioner’s name
  ○ Date of the order
  ○ Prescribing physician/practitioner’s signature (if a written order) or supplier signature (if verbal order)

**NOTE:** A dispensing order is only required if the items are dispensed prior to obtaining the detailed written order.

☐ Detailed Written Order (original, faxed or copied) that contains:
  ○ Beneficiary’s name
  ○ Prescribing physician/practitioner’s signature (and date if applicable*)
  * Someone other than the physician/practitioner may complete the DWO of the item unless statute, manual instructions, the contractor’s LCD or policy articles specify otherwise. However, the prescribing physician/practitioner must review the content and sign and date the document.
  ○ Date of the order
  ○ All items, options or additional features that are separately billed or require an upgraded code. The description can be either a narrative description (e.g., lightweight wheelchair base), a HCPCS code, a HCPCS code narrative, or a brand name/model number.
  ○ Type of Dressing
  ○ Size of the Dressing (if appropriate)
  ○ The number/amount to be used at one time (if more than one)
  ○ The frequency of dressing change
  ○ The expected duration of need

☐ The practitioner’s signature on the written order meets **CMS Signature Requirements**

WRITTEN ORDER REMINDERS

• Suppliers should not submit claims to the DME MAC prior to obtaining a detailed written order.

• Items billed to the DME MAC before a signed and dated detailed written order has been received must be submitted with modifier EY.

• A new order is required at least every 3 months for each dressing being used even if the quantity used has remained the same or decreased.

• A new order is required whenever the quantity to be used has increased.

### All of the Following Criteria Are Met:

- The medical records confirm that the surgical dressings are required for one of the following reasons:
  - The treatment of a wound caused by, or treated by, a surgical procedure; or
  - When required after debridement of a wound
- The surgical dressing code was billed with modifiers A1-A9

### Medical Records

- Information defining the number of surgical/debrided wounds being treated with a dressing
- Whether the dressing is being used as a primary or secondary dressing or for some non-covered use (e.g., wound cleansing)
- Evaluation of the patient’s wound(s) performed at least on a monthly basis unless there is documentation in the medical record which justifies why an evaluation could not be done within this timeframe and what other monitoring methods were used to evaluate the patient's need for dressings.
- Evaluation is expected on a more frequent basis (e.g., weekly) in patients in a nursing facility or in patients with heavily draining or infected wounds.
- The type of each wound (e.g., surgical wound, pressure ulcer, burn, etc.), its location, its size (length x width in cm.) and depth, the amount of drainage, and any other relevant information

### Basic Coverage Criteria

All of the following specific criteria below must be met for Alginates (A6197 or A6199):
Alginate or other fiber gelling dressing covers are covered for moderately to highly exudative full thickness wounds (e.g., stage III or IV ulcers).

Alginate or other fiber gelling dressing fillers for moderately to highly exudative full thickness wound cavities (e.g., stage III or IV ulcers).

They are not medically necessary on dry wounds or wounds covered with eschar.

Usual dressing change is up to once per day.

One wound cover sheet of the approximate size of the wound or up to 2 units of wound filler (1 unit = 6 inches of alginate or other fiber gelling dressing rope) is usually used at each dressing change.

It is usually inappropriate to use alginates or other fiber gelling dressings in combination with hydrogels.

Basic Coverage Criteria above plus the following specific criteria below must be met for foam dressings (A6210 or A6212):

- Foam dressings are covered when used on full thickness wounds (e.g., stage III or IV ulcers) with moderate to heavy exudate.
- Dressing change for a foam wound cover used as a primary dressing is up to 3 times per week. When a foam wound cover is used as a secondary dressing for wounds with very heavy exudate, dressing change may be up to 3 times per week.
- Dressing change for foam wound fillers is up to once per day.

Basic Coverage Criteria above plus the following specific criteria below must be met for Collagen dressings (A6010, A6011, A6021-A6024):

- Collagen-based dressing or wound filler is covered for full thickness wounds (e.g., stage III or IV ulcers) wounds with light to moderate exudate, or wounds that have stalled or have not progressed toward a healing goal.
- Collagen dressings can stay in place up to 7 days, depending on the specific product.
- Collagen based dressings are not covered for wounds with heavy exudate, third-degree burns, or when an active vasculitis is present.

The signatures on the medical records meet CMS Signature Requirements [CMS Signature Requirements](https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/downloads/MM6698.pdf)

Claims for Quantities above the normal allowance

- Suppliers are also expected to have a mechanism for determining the quantity of dressings that the patient is actually using and to adjust their provision of dressings accordingly.
- No more than a one month’s supply of dressings may be provided at one time, unless there is documentation to support the necessity of greater quantities in the home setting in an individual case.

REMINDERS

- When surgical dressings are billed, the appropriate modifier (A1-A9, EY, or GY) must be added to the code when applicable.
- If A9 is used, information must be submitted with the claim indicating the number of wounds.
- If GY is used, a brief description of the reason of non-coverage (e.g., “A6216GY – used for wound cleansing”) must be entered in the narrative field of the electronic claim.
- Items with no physician or other licensed health care provider order must be submitted with an “EY” modifier added to each affected HCPCS code.

- Staging of Pressure Ulcers is included in the Appendices of the LCD

**NOTE:** It is expected that the patient’s medical records will reflect the need for the care provided. These records are not routinely submitted to the DME MAC but must be available upon request. Therefore, while it is not a requirement, it is a recommendation that suppliers obtain and review the appropriate medical records and maintain a copy in the beneficiary’s file.
